Cast Iron Flanged End Wye Strainers

Model: 758, Class 125
758 SM, Class 125

Sizes: 3/4" - 24", 2" - 24" (758 SM Only)

The 758 and 758 SM wye strainers provide economical protection for costly pumps, meters, valve and other similar mechanical equipment by straining foreign matter from the piping system. Installation of a strainer before mechanical equipment can ensure trouble free service and avoid costly shutdowns for repair or replacement of equipment damaged by foreign matter. Smart and Connected technology comes standard on the NEW 758 SM wye strainer with two pre-installed pressure sensors at the inlet and outlet of the strainer. These sensors monitor the pressure drop that occurs over time when a strainer screen becomes clogged by foreign particles. When the differential pressure across the strainer screen exceeds the preconfigured threshold, an alert is triggered to the customer informing that action is required. The Sensor Monitoring Control Unit & Connection kit is required to activate the pressure monitoring capability and collect data. Without the connection kit, the sensors are passive components that do not communicate with any other device. The add-on connection kit communicates over wired RS-485 MODBUS or BACnet connection and is compatible with most Building Management and Building Automation Systems. An alternate cellular communication gateway option is available if no BMS is present, however this option provides alerts only, data streaming is not available.

Features

- Mueller "BREECH-LOK STRAINERS" furnished as standard in sizes 8" and larger
- A one-quarter turn securely locks the screen in its seat
- Allows for easy bolting of the cover flange
- Tapered seats in both the body and cover flange retain screen and prevent particle bypass

Features for 758 SM

- Real-time pressure monitoring
- Visual Display - Pressure and temperature data for each sensor, Screen Pressure differential, Screen fill percentage
- Data streaming if connected to BMS [RS-485 MODBUS or BACNet]
- Full basket alerts
- Cellular Communications Gateway if no BMS present

Mueller Steam Specialty product specifications in U.S. customary units and metric are approximate and are provided for reference only. For precise measurements, please contact Mueller Steam Specialty Technical Service. Mueller Steam Specialty reserves the right to change or modify product design, construction, specifications, or materials without prior notice and without incurring any obligation to make such changes and modifications on Mueller Steam Specialty products previously or subsequently sold.

Purple Engineering

Construction

- All covers have NPT blowoff outlet at location C.
- Recessed seat in the cover assures accurate screen alignment
- Bosses at the inlet and outlet flanges are provided for the gauge taps

Self-Cleaning

- Self-cleaning is accomplished by opening the plug or valve connected to the blowoff outlet
- Advise when strainers are to be mounted in vertical piping so we can rotate the cover to position the blowoff at the lowest point

Blowoff Outlets

- Outlets are NPT tapped
- Sizes of tapping specified in dimensions table
- Not normally furnished with plug. Plug available, specify with order

Capacity

- Generously proportioned bodies
- Open Area Ratio much greater than pipe size, ensuring low pressure drop

Materials

BILL OF MATERIAL - 758		
ITEM	DESCRIPTION	MATERIAL
1	BODY	Cast Iron ASTM A126-B
2	COVER **	Cast Iron ASTM A126-B
3	SCREEN	304 SS
4	GASKET	Non-Asbestos
5	HEX HEAD CAP SCREWS	SAE J429 Gr. 5
6	PRESSURE SENSOR	Mixed composite

** Cover may be manufactured from equivalent grade plate material
